AIDEN TERRY

Beaver Falls, PA | P: 724-650-7372 | terry332024@gmail.com | www.linkedin.com/in/Aiden-Terry

EDUCATION

Penn State Erie, The Behrend College
Bachelor of Science, Mechanical Engineering — Graduation: May 2028

- GPA: 3.01
- Recipient of Penn State Academic Grant

WORK EXPERIENCE

Harmony Castings LLC — Harmony, PA
Mechanical/Robotics Engineer Intern — May 2026 – Aug 2026

- Installed and configured Banner QM30VT3 sensors to monitor motor and bearing temperature plus X/Y/Z vibration, supporting predictive maintenance and real-time data visualization in Ignition.
- Programmed FANUC robotic scanning routines for a Creaform MetraSCAN-R Black Elite system using teach-pendant paths and custom automation software to improve repeatability of production-part scans.
- Designed and built scanning fixtures, a calibration-plate holder, worktable stops, and cable-management hardware to improve setup consistency and shop-floor safety.
- Planned sensor and cable installation on a 3D model and coordinated power/Ethernet requirements with maintenance before deployment.
- Designed SolidWorks fixtures supporting an AI robotic grinding/blending system while coordinating requirements with an outside automation partner.

Impact Guard LLC — Leetsdale, PA
Mechanical Engineer Intern — May 2025 – Aug. 2025

- Redesigned plant layout in Autodesk Revit, streamlining facility mapping to enhance safety compliance and improve operational efficiency.
- Streamlined machine documentation in AutoCAD by condensing ~10 redundant layers into organized, machine-specific layouts, enhancing clarity and efficiency of design files.
- Developed an updated product holding station using Autodesk Inventor, enhancing the original design by converting hand-drawn measurements into optimized digital models.
- Translated machine operations into scalable vector graphics (SVGs) with Inkscape, streamlining documentation and supporting digital design workflows.
- Collaborated with a team to integrate custom SVG files into Ignition, developing HMIs (Human-Machine Interfaces) for various machines.

PA West — Pittsburgh, PA
Match Official (Soccer) — Sept. 2021 – ongoing

- Officiate youth and adult soccer matches, ensuring compliance with game rules and maintaining a fair, safe, and competitive environment.
- Make quick, decisive judgments under pressure, balancing rule enforcement with conflict resolution between players, coaches, and spectators.

PROJECTS

Control Wall — Aug. 2025

- Worked in a team to design a centralized factory control wall, allowing operators to manage multiple machines from a single hub, reducing manual adjustments, and increasing efficiency.
- Created custom SVGs and HMIs to integrate machine controls, improving usability and streamlining operator interaction with factory machinery.

Plastic Bottle Recycling to 3D Printer Filament — Mar. 2024 –May 2024

- Designed and developed a machine to recycle plastic bottles into 3D printer filament, promoting sustainable material reuse and reducing waste.
- Designed and fabricated a custom PCB from a blank copper board, including etching traces, drilling holes, and assembling components to serve as the central controller for the system.

SKILLS

Technical Skills: Autodesk AutoCAD & Inventor, Revit, Inkscape, Ignition, and 3D printing, FANUC teach pendant, Creaform MetraSCAN, SolidWorks

Programming Language: HTML, and MATLAB

Certification & Training: MSSC Certified in Safety, Quality Practices, Manufacturing Process, and Maintenance Awareness
